IBS4 Interactive Biostimulation System

Simultaneously allows skin biostimulation and transdermal delivery

# REVOLUTIONARY

Thanks to the **the simultaneous action of biostimulation and transdermal delivery**, as well as the constant control of the energy flow, an effectively regenerative and an unprecedented beneficial action will be obtained.

# EASY

Provided with an interactive system capable of automatically modulating tissue biostimulation. Outfitted with a simple and **intuitive parameters adjustment system**.

# NATURAL

## CELL BIOSTIMULATION

This system **stimulates cell metabolism as well as cell reorganization**, thus helping the process of tissue regeneration while respecting the physiology of biological substrata, without any side effect.

# NON-INVASIVE

## NEEDLELESS INFILTRATION

Thanks to its specific impulse, it allows the **penetration of the hydro-soluble active principle**, directly on the intimate area being treated, without any risk of invasiveness.

# IBS4 SYSTEM

SISTEMA IBS4 Interactive Biostimulation System

This device is controlled by an intelligent system which allows to interact in real time with cellular environment and to promptly modify tissue metabolism, thus guaranteeing **visible results from the very first treatment session**.

## EFFECTIVE

Trustworthy **clinical researches** conducted in collaboration with international universities have pointed out that our system, thoroughly non-invasive and free from any side effect, leads to demonstrated results even in most critical cases.
